(54) METHOD AND DEVICE FOR CALLING PROCESSING TASK EXECUTION IN DISTRIBUTED SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To improve a method and device for calling processing task execution in a distributed system.

SOLUTION: In the method for calling the execution of a processing task (task) on a remote processor 120, which is executed by a first processor 105 within a distributed calculating system 100, the task is operated in a first name space related to the first processor and the first name space consists of plural name space correcting commands. This method consists of a step setting a communication link 150 between the first processor and the remote processor, a step for specifying plural name correcting commands consisting of at least one dynamic name space correcting command forming the first name space, and a step for transmitting these plural name space correcting command to the remote processor in order to execute the task by the remote processor on the corrected name space based on these plural name space correcting commands.
